

Keep your soles in tip-top condition

To maintain the effective performance of your Shoes For Crews® footwear, clean the slip-resistant outsoles of your shoes and remove build-up between the tread grooves regularly.

Remember—no sole is 100% slip-proof. Combine wearing your Shoes For Crews with proper floor maintenance to achieve maximum slip and fall prevention.

THE GRID CLEANER AND WEAR INDICATOR TOOL

Every pair of Shoes For Crews comes with our SFC Grid Cleaner and Wear Indicator.

Use yours to keep the tread of your outsoles clean and in top gripping condition.

CLEAN YOUR OUTSOLES

Move the SFC Grid Tool back and forth between the channels to unclog them. Clean the Grid Tool with soap and water after every use.

CHECK FOR WEAR & TEAR

To measure your outsole's wear and tear, insert the measuring tab into the middle of your shoe's heel. If the word WORN is completely visible, it is time to replace your Shoes For Crews.

To ensure the most effective slip-resistant traction, we strongly recommend replacing your footwear every 6 months.
